WET AREA SOLUTIONS FOR  
PREFABRICATED STRUCTURES

# About COMPANY

---

Rooted in 1997 and officially established in 2004, **Banaks Group** operates from its 8,000 m<sup>2</sup> production facility in Ankara, delivering specialized solutions to the **construction industry**, with a strong focus on **prefabricated and modular structures**.

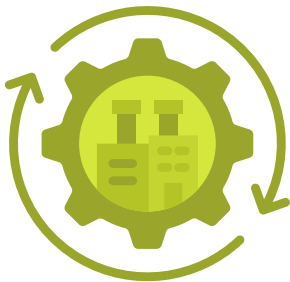

Our production capabilities are built on **thermoform vacuum** and **composite** manufacturing technologies, offering a diverse product range including **shower trays, WC pans, monoblock shower units, and complete bathroom floors**. All our products are **CE and ISO certified**, ensuring quality, durability, and compliance. We specialize in tailored manufacturing to meet the specific needs of each project.

Our mission is to provide **environmentally responsible** and **customer-centric** solutions. In essence, what drives us is: "**Produce, produce, produce.**"

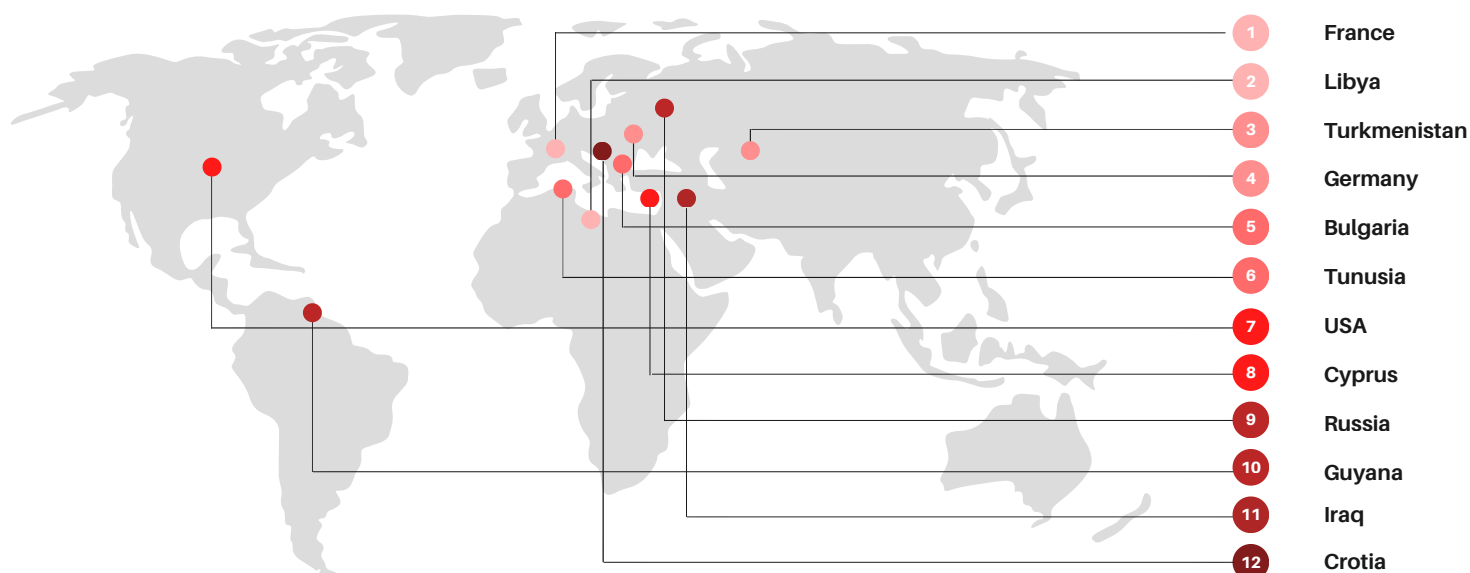

Our vision is to constantly adapt to emerging technologies and strive to "**produce better, produce better, produce better.**"

What sets us apart is not only our technical capability, but also our **support during the project** phase and our commitment to **after-sales service**. No matter where our clients are in the world, we guarantee **intervention within 10 days** for after-sales support.

Today, we are proud to collaborate with many of Turkey's leading companies, including **Dorçe Prefabricated, Treysan Prefabricated, TNR Prefabricated, and Tepe Prefabricated**, contributing to high-quality, high-performance construction projects.

# Where Are Our Products Used?

Our products are successfully used in a wide range of regions, from Europe to Africa and from the Middle East to the Americas.

Our solutions are preferred and actively implemented in international projects where prefabricated and container structure manufacturers across Turkey serve as main contractors.

Designed to adapt to different climate conditions, challenging site environments, and varying project requirements, our products add reliability to projects with their durability, ease of installation, and long-lasting structure.

At Banaks, we are not just a supplier; we are a business partner offering a solution-oriented approach at every stage of the project.

# Shower Tray

Square, Rectangle, Oval

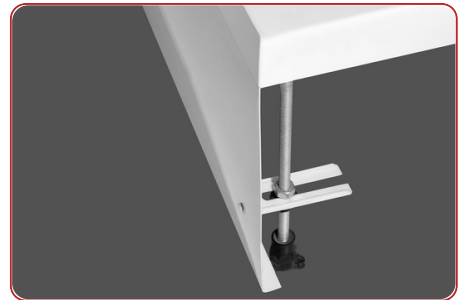

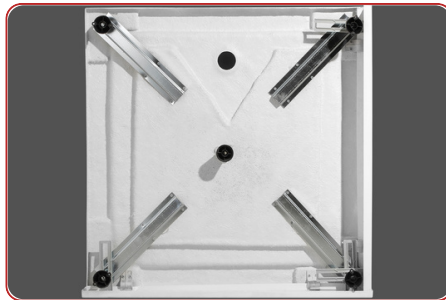

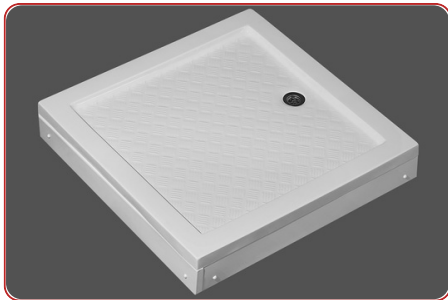

**Flat**

**Monoblock**

**Panelled**

Our shower trays are designed to meet the demands of modern construction projects, offering high durability and complete water tightness. Thanks to their lightweight yet strong structure, they are easy to transport and allow for fast installation, significantly reducing on-site labor time. Their special surface technology ensures hygienic use, while the anti-slip design enhances safety during daily use.

## Flat Shower Tray

Its slim structure allows for near flush-to-floor installation, creating a modern and seamless look. The non-slip surface ensures safe use, making it an ideal solution for contemporary flat shower areas.

## Monoblock Shower Tray

One-piece, lightweight and durable design. Easy to install with a non-slip surface for safe and modern prefabricated bathrooms.

## Panelled Shower Tray

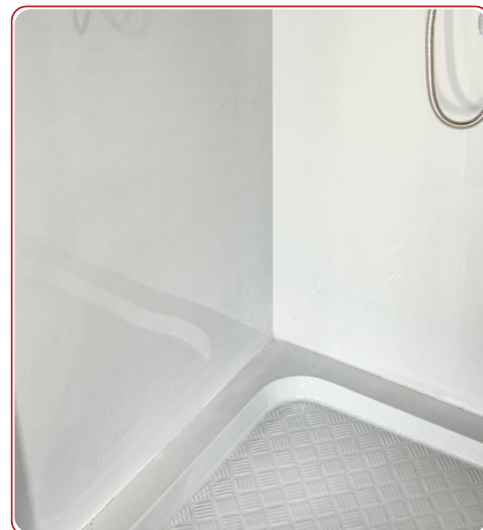

Raised base and panels allow quick installation and easy access to plumbing. Ideal for fast and clean modular setups.

# Monoblock Bathroom Unit

Square, Rectangle

The modular system, specially designed for prefabricated structures, allows you to install as many shower units side by side as needed. Wherever there is a water connection, your shower is ready to use.

Our monoblock shower unit is a “plug-and-play” solution that delivers all shower needs in a single, compact structure. Thanks to its integrated design, it minimizes on-site labor requirements and significantly reduces installation time, leading to substantial savings in overall project costs. With its leak-proof, durable, and hygienic construction, it is an ideal solution for prefabricated buildings and container-based projects.

# Monoblock Bathroom Unit

Square, Rectangle

Designed with efficiency and reliability in mind, the monoblock shower unit offers a seamless combination of functionality and performance. Its factory-assembled structure ensures consistent quality control while eliminating common installation errors on site. The compact, all-in-one design optimizes space usage, making it especially suitable for projects with limited areas. In addition to its quick installation advantage, it reduces maintenance needs over time thanks to its robust materials and integrated system. By streamlining both logistics and operation, it provides a cost-effective, long-lasting solution that enhances overall project value.

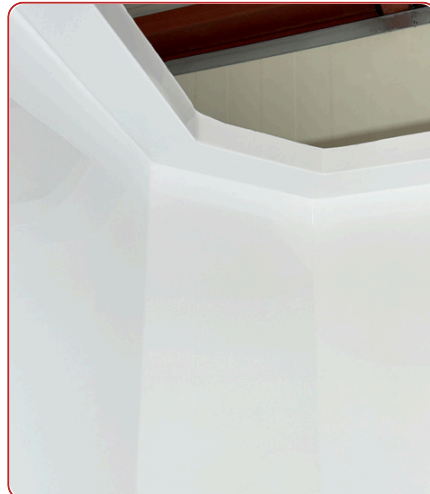

# Monoblock Toilet Unit

Square, Rectangle

Engineered for prefabricated applications, the modular toilet system offers flexible configuration, allowing multiple units to be aligned side by side according to project needs. Once connected to water and sewage infrastructure, the unit becomes fully operational with minimal effort.

Our monoblock toilet unit is a compact, ready-to-install solution that brings together all sanitary components within a single body. Its pre-assembled structure reduces the need for on-site workmanship, shortens installation time, and helps optimize overall project costs. Built with durability, watertightness, and hygiene in mind, it stands out as a reliable and efficient choice for prefabricated and container-based constructions.

# Monoblock Toilet Unit

Square, Rectangle

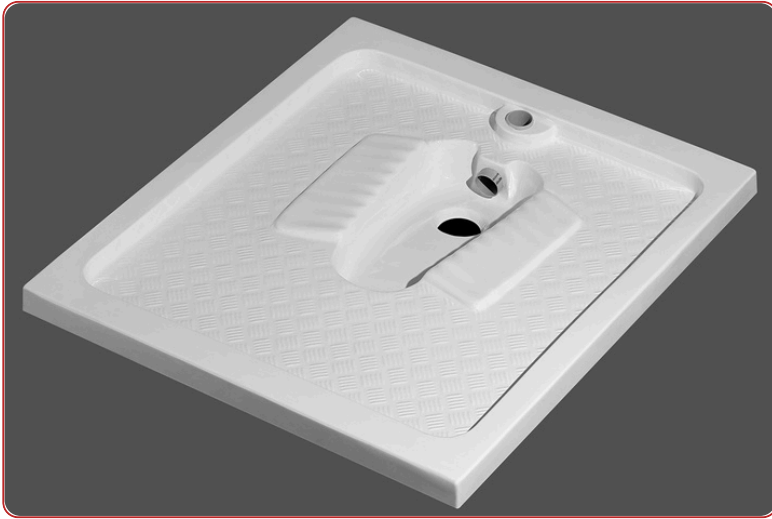

Built to deliver dependable performance and operational efficiency, the monoblock toilet unit combines smart design with practical functionality. Manufactured as a complete, ready-to-install module, it ensures high production quality while reducing the likelihood of errors during on-site setup. Its space-saving, integrated structure makes it ideal for projects where optimizing available area is essential. The durable construction and unified system not only enable quick installation but also help minimize long-term maintenance needs. By simplifying installation, usage, and upkeep, it provides a reliable and economical solution that supports the overall success of the project.

# Squat WC Pan

Square, Rectangle

Our acrylic toilet pans are lightweight and durable, making them much easier to transport and faster to install compared to ceramic alternatives. Their smooth, non-porous surface ensures hygienic use while minimizing the formation of dirt and bacteria. With high resistance to impact, they maintain their form and performance even under heavy usage conditions.

In addition, the flexibility of acrylic material significantly reduces the risk of cracking or breakage. The easy-to-clean surface simplifies maintenance processes, while its long-lasting structure helps lower overall operating costs. Manufactured using modern production techniques, these products meet both aesthetic and functional expectations. They offer an ideal, reliable, and cost-effective solution for prefabricated buildings, container projects, and high-traffic areas.

# Squat WC Pan

Square, Rectangle

- The WC pan's internal flushing system effectively cleans every corner, ensuring superior hygiene.
- Waste is directed straight to the drain, preventing backflow and simplifying installation.
- The non-slip base provides safe footing, reducing the risk of slipping, especially on wet floors.

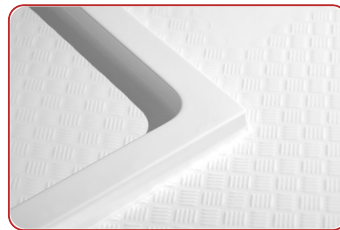

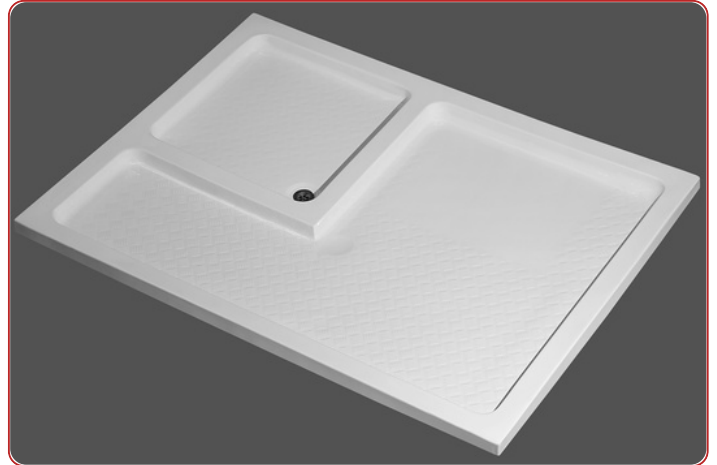

# Bathroom Floor with Toilet Section

## Square, Rectangle

Our modular bathroom flooring system integrates the shower area, WC, and washbasin sections into a single, unified structure, minimizing on-site installation time. With its water-resistant properties, high strength, and project-specific production flexibility, it offers a practical, reliable, and ideal solution for prefabricated buildings and container-based projects.

Designed with ease of installation in mind, the system allows for quick and hassle-free assembly on site. Its pre-engineered structure reduces the need for specialized labor and minimizes the risk of installation errors. With fewer components and simplified connections, the overall setup process becomes faster and more efficient. This streamlined installation approach helps save both time and labor costs while ensuring consistent results.

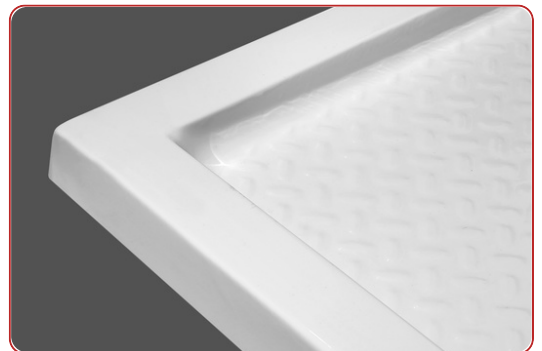

# Bathroom Floor with Squat Toilet Section

Square, Rectangle

Our Bathroom Floor with Squat Toilet Section product is designed as an integrated modular solution that combines the bathroom flooring and squat toilet area into a single, ready-to-install unit. Its robust, water-resistant structure ensures long-term durability while providing reliable performance in demanding environments. Thanks to its prefabricated design, it significantly reduces on-site installation time and minimizes the need for complex workmanship.

The unit offers excellent hygiene standards with its easy-to-clean surface and seamless construction that prevents water leakage and buildup of dirt. Designed with ease of installation in mind, the system allows for quick and hassle-free assembly on site.

# Sinks / Washbasins

Oval, Rectangle

Engineered for high-traffic construction sites, these Banaks Sanitary solutions prioritize practical utility and rapid deployment. The large industrial sink unit features a full-cabinet design that hides plumbing for a clean look while supporting dual taps for simultaneous use. The compact wall-mounted basin is designed specifically for tight spaces like mobile offices or containers, maximizing floor area. Both products are built for 'plug-and-play' installation, allowing for quick setup and immediate use. Made from heavy-duty, easy-to-clean materials, these units offer a robust and low-maintenance sanitation solution that stands up to the toughest field conditions.

With their seamless surfaces and streamlined assembly, these solutions transform site sanitation into a hassle-free, professional experience from day one.
